Enforcement on biocidal products – PT3

Inspection Findings – Requirements for Corrective Actions

The Icelandic Environment and Energy Agency (*Umhverfis- og orkustofnun*) is working on an enforcement project on biocidal products, in accordance with the Agency's role under the Chemicals Act No 61/2013 and Regulation No 878/2014 on Biocidal Products, which implements Regulation (EU) No 528/2012 (BPR) into Icelandic legislation. Findings of the enforcement project will be submitted to the European Chemicals Agency (ECHA) and will be a contribution to the EU/EFTA coordinated enforcement project BEF-3, organized by ECHA. The objective of BEF-3 is to harmonize enforcement across member states regarding the use of information from the SPC in the labelling and safety data sheets of biocidal products made available on the EEA market.

The Agency refers to letter addressed to the Icelandic company Lífland ehf. dated 22.05.2025, where the company is notified about an upcoming inspection on marketing and labelling of biocidal products of product-type 3 (veterinary hygiene). The inspection was carried out the same day at the Lífland ehf. sales premises in Selfoss. During the inspection it was i.a assessed whether products holding a market authorisation in Iceland were labelled in accordance with the approved Summary of Product Characteristics (SPC). In addition, it was assessed whether information in the safety data sheet (SDS) was consistent with the SPC, and that section 1.4 (Emergency Information Service) had been localized.

Applied Biocide GmbH is the authorisation holder of the inspected teat dipping product **KerbaDip Jod (KERBL) (EU-0020540-0002)** and shall ensure that the product is labelled in accordance with the approved Summary of Biocidal Product Characteristics (SPC), in accordance with Article 69 of the BPR.

Non-compliances identified during the inspection are detailed in the attached inspection report in Icelandic and summarized in English below.

Product: KerbaDip Jod (KERBL)

Description of non-compliance	Legal/regulatory provisions
1. The trade name, KerbaDip Jod, is not specified as one of the trade names in the market authorisation. 2. Information from section 5.5 of the SPC that the product should be stored at room temperature is missing on the product label.	Deviation from Article 69(1) of Regulation (EU) No 528/2012 (BPR), as implemented by Icelandic Regulation No 878/2014 on biocidal products and Article 35(4) of the Icelandic Chemicals Act No 61/2013.
3. Directions for use on the product label shall be updated in accordance with sections 4.1, 5.1 and 5.2 of the SPC. 4. First aid instructions from section 5.3 of the SPC are missing from the product label. 5. Directions for safe disposal of the product and its packaging from section 5.4 of the SPC are missing from the product label. 6. Information on any specific danger to the environment particularly avoidance of contamination of water from section 5.3 of the SPC are missing from the product label.	Deviation from points (g), (h), (j) and (n) of Article 69(2) of Regulation (EU) No 528/2012 (BPR), as implemented by Icelandic Regulation No 878/2014 on biocidal products.
7. The signal word, hazard and precautionary statements in Icelandic are missing on the label in accordance with section 6 of the SPC for the product.	Deviation from Articles 20-22 of Regulation (EU) No 1272/2008 (CLP), as implemented by Icelandic Regulation No 415/2014 and Article 32(1) of the Chemicals Act No. 61/2013.

The Environment and Energy Agency would like to emphasize that it is prohibited to place on the market any products that do not comply with the requirements concerning authorisation and labelling, cf. Article 35(1) and Article 32(3) of the Chemicals Act.

The Agency sets out a deadline until 12 March 2026 for Applied Biocide GmbH to submit updated labelling for the above-mentioned product. Existing stocks of the product shall be re-labelled with updated labelling approved by the Agency.

Confirmation of corrective actions shall be submitted by email to the Agency's official address: uos@uos.is, referencing case number UOS-3173.

Applied Biocide GmbH has until 5 March 2026 to present its comments or remarks to the Agency about the contents of this letter, pursuant to Article 13 of the Icelandic Administrative Act No 37/1993.

Please note that, in accordance with Article 49(5) of the Chemicals Act, the Agency will publish on its official website information regarding the inspection results and any enforcement measures taken, as soon as decisions on such measures are finalized. If the company considers that any part of this letter or the inspection report contains information that should be treated as confidential, it must notify the Agency and provide a justified request to that effect no later than 5 March 2026.

The Agency would also like to note that, under Chapter XIII of the Chemicals Act, the Agency may apply enforcement measures to ensure compliance with the Act, including suspension of products from the Icelandic market (Articles 57 and 58).

Furthermore, pursuant to the Icelandic Environment and Energy Agency's list of fees No 1033/2025, the Agency will charge an hourly fee of ISK 22.400 (approx. EUR 153) for follow-up inspections and enforcement activities, cf. Article 22.

For information, the biocidal product KerbaWasch from the producer Albert Kerbl GmbH was also inspected at the Lífland premises. The product does not have a market authorisation in Iceland, and the product has been temporarily withdrawn from the market.

Further information regarding biocidal products can be found [here](#).

Yours sincerely,

Bergdís Björk Bæringsdóttir

Chemicals Unit

Hafdís Inga Ingvarsdóttir
